SUMMARY

Full Stack Software Engineer with proven expertise in designing, developing, and deploying robust and scalable web applications. Proficient in the full software development lifecycle, utilizing Node.js, React.js, Next.js, and Go. Strong background in designing RESTful APIs, implementing user authentication, and developing responsive interfaces. Solid understanding of data structures, algorithms, and design patterns, with hands-on experience in PostgreSQL and MySQL database design. Seeking a full-time Software Engineer position to contribute technical skills and grow within a dynamic development team.

SKILLS

Programming Languages: TypeScript, JavaScript, SQL, Python, Go

Tech Stack

- **Frontend:** Next.js, React.js, Vue.js, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, NestJS, GoFiber, REST API, Prisma ORM
- **Database:** PostgreSQL, MySQL, Supabase, MongoDB
- **Tools:** Docker, Figma, Git, Postman, Vercel

WORK EXPERIENCE

Ngern Hai Jai Co., Ltd.	April 2025 - June 2025
Software Engineer	Bangkok, Thailand
• Developed and optimized production features using Next.js and Golang, contributing to improved application performance and user experience • Collaborated within an Agile team, participating in sprint planning and iterative delivery cycles to meet project deadlines • Managed codebase using Git and GitHub, handling branching, pull requests, and code reviews in a team environment • Gained real-world exposure to end-to-end software development, from requirement discussion to deployment • Worked with Microservices architecture to build and maintain scalable and modular backend services • Applied Domain-Driven Design (DDD) principles to organize business logic and improve system maintainability	

PROJECTS

Borrow - Return Equipement System Next.js, Node.js, Express.js, Tailwind.css, SQL, Swagger	July 2025 - October 2025
• Developed a web-based system to manage equipment borrowing, returns, and maintenance requests. • Built a robust RESTful API using Node.js and Express.js to handle all operations related to users, equipment, and requests, ensuring scalable software solutions. • Implemented user authentication and role-based access control for three distinct user levels (Admin, Staff, User). • Designed a borrowing module to track the entire lifecycle of an equipment request, from submission to approval and return. • Created a maintenance request module for users to report issues and for staff to update and manage repair status. • Developed a reporting feature to generate summaries of equipment usage and maintenance history for analysis. • Documented all API endpoints using Swagger to ensure clear integration with front-end services.	
Car Repair Booking System React.js, Node.js, Express.js, Tailwind.css PostgreSQL	January 2025 - March 2025
• Developed a web-based car repair appointment system with real-time booking management, improving customer service. • Built a responsive UI using React.js and Tailwind CSS, ensuring an intuitive user experience across devices. • Implemented RESTful API with Node.js and PostgreSQL for handling customer requests and repair schedules. • Developed a payment verification system to track and confirm service payments, ensuring accurate financial records. • Implemented user authentication with login and registration functionality, securing user data. • Designed a repair history module to store past service records, providing comprehensive customer data. • Integrated a payment history feature to keep track of past transactions.	

EDUCATION

Kasetsart University	
Bachelor of Science in Information Technology 3.91 GPA	2022 - 2025
